ABSTRACT

~~CASE, OF THE MAKE-UP CASE TYPE, WITH AN ARTICULATED LID~~

A

~~The present application relates to a~~ case (1) for packaging a product (P), particularly a cosmetic product, ~~including~~ includes a base (2) delimiting at least one housing (2a) containing the product (P), and a lid (4) articulated on the base via an intermediate element (20) capable, in a first configuration of the case, of pivoting both relative to the lid (4) and relative to the base (2), so as to allow the lid (4) to pivot through 360° relative to the base, the intermediate element (20) including catch means (C) capable, in a second configuration of the case, called the "use" configuration, of engaging with complementary catch means (B) of the base (2) so as to allow the locking of the intermediate element (20) on the base (2).
